What is OCR?

DETECTION

*This tells us
where the text
areas are
situated on the
screen*

PUI8 BES

RECOGNITION

*This gives us the
content*

PUI8, BES

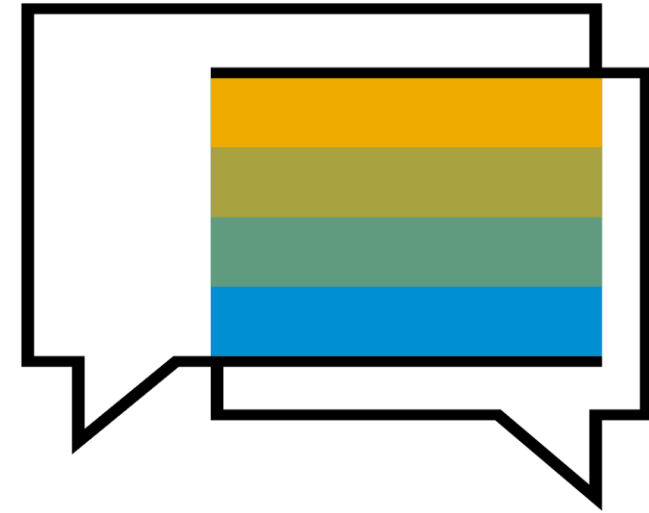

SAP Intelligent RPA with OCR

We are using OCR for **surface automation**, i.e. automation of UI based on visual elements where we stay on the surface rather than use underlying UI technology (DOM etc.), APIs etc.

It is typically used for automating Flash applications or applications running in a virtual environment where we're not allowed to install agent/desktop.

Support for languages

- As of now, 3 languages are supported – English, French, and German.
- Only one language per recognition call is supported.

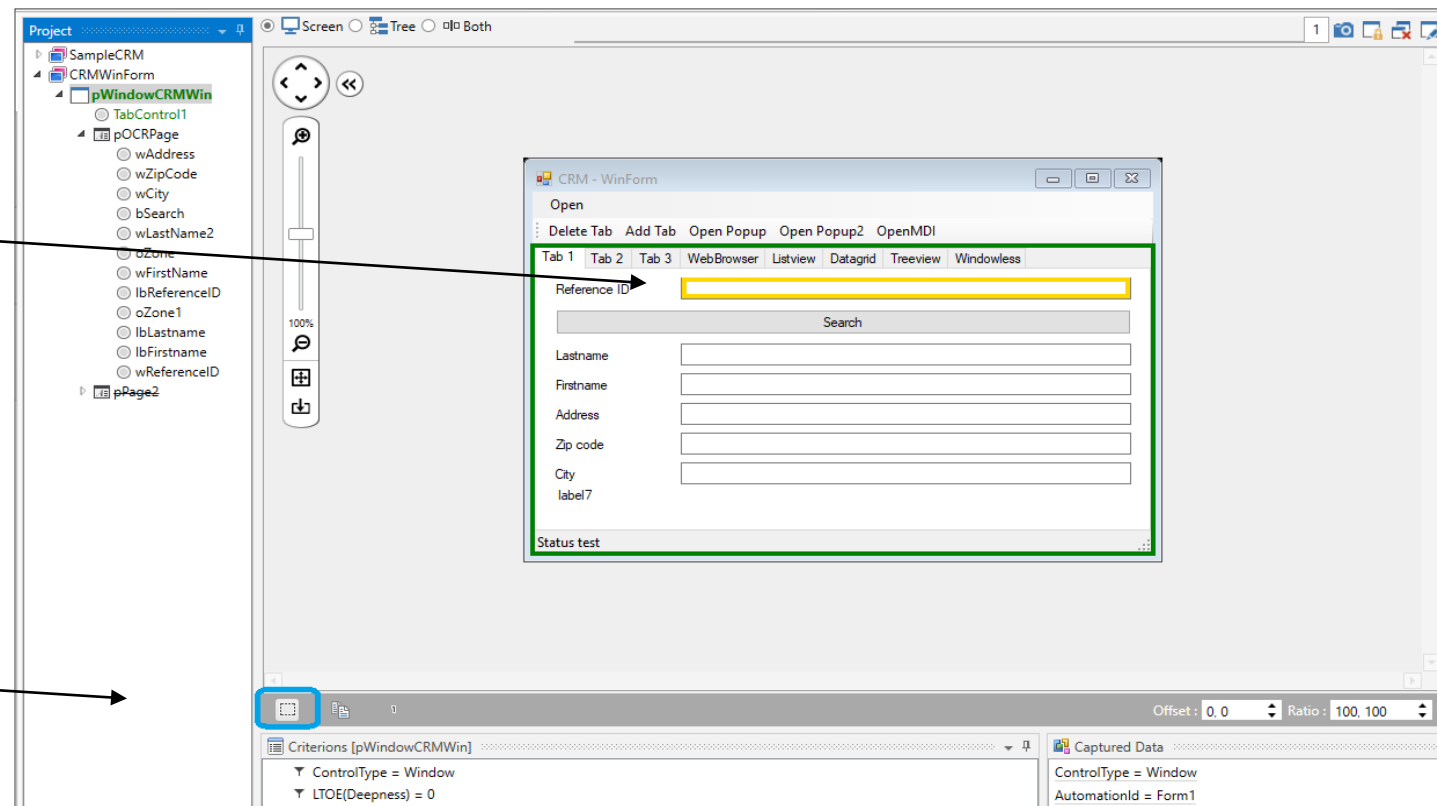

Steps to declare and recognize item using OCR

Capture the page using OCR technology [select technology as OCR]

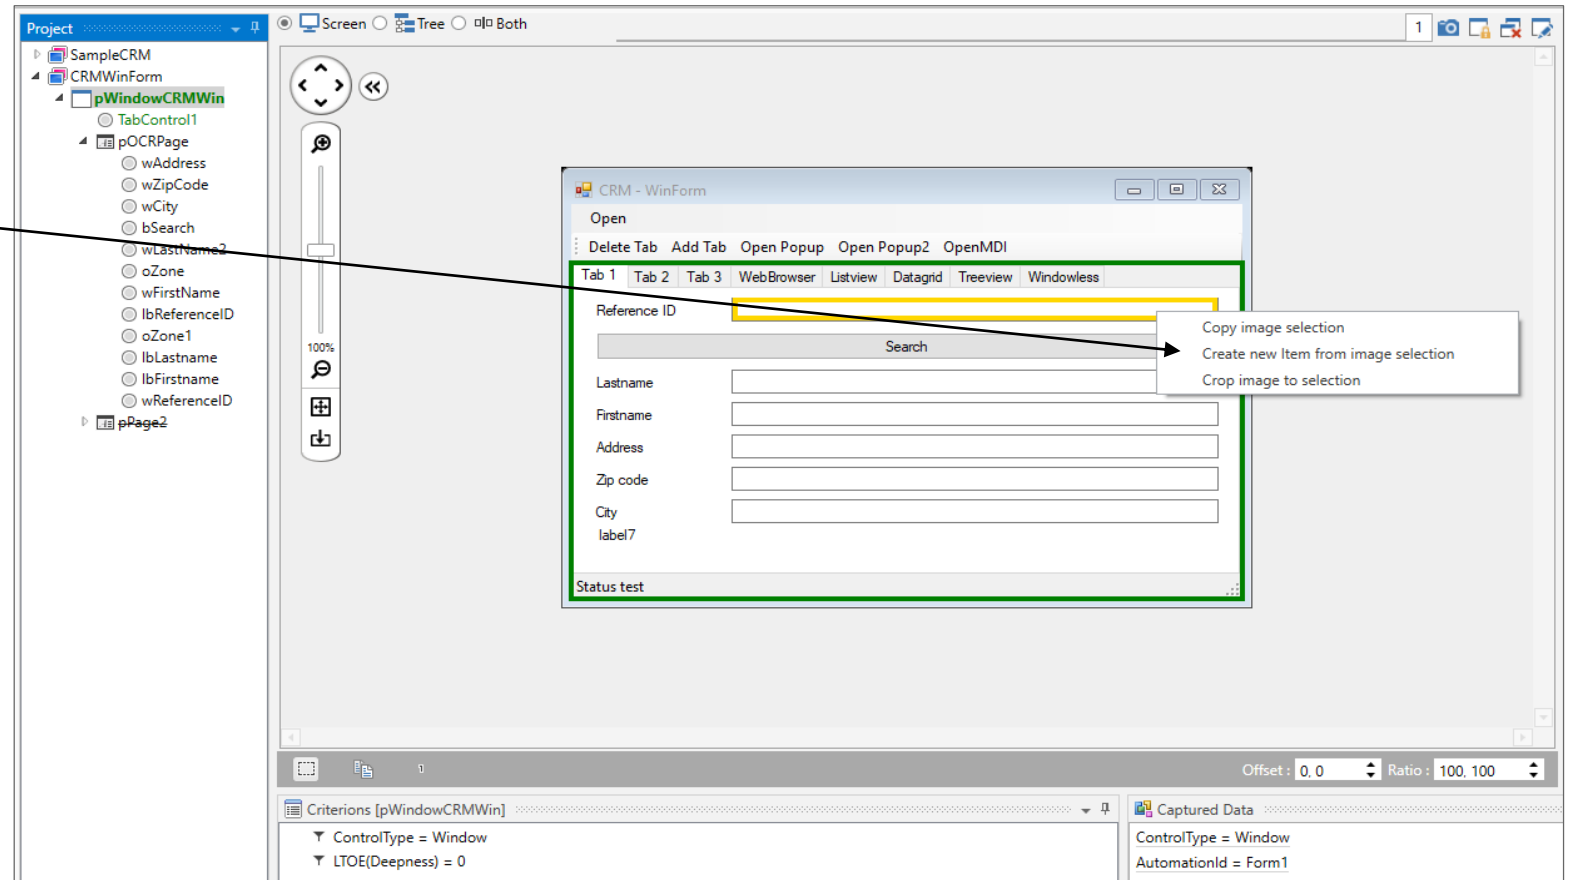

Select the area to
read/write/click

Image selector

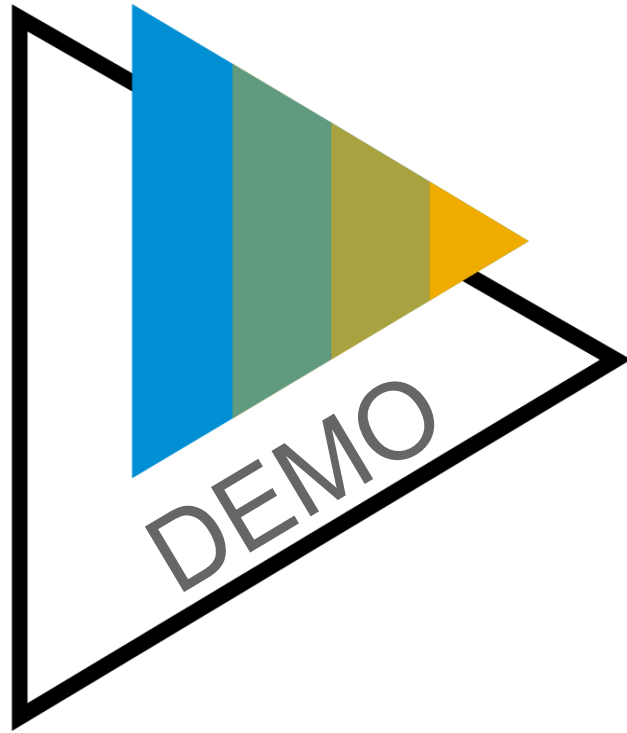

Steps to declare and recognize item using OCR

- Right-click on the marked area
- Select → “Create new Item from image selection”
- The above steps will add an item for the marked area
