

Week 3: Development Phase II

Unit 3: UI Designer – UI Creation

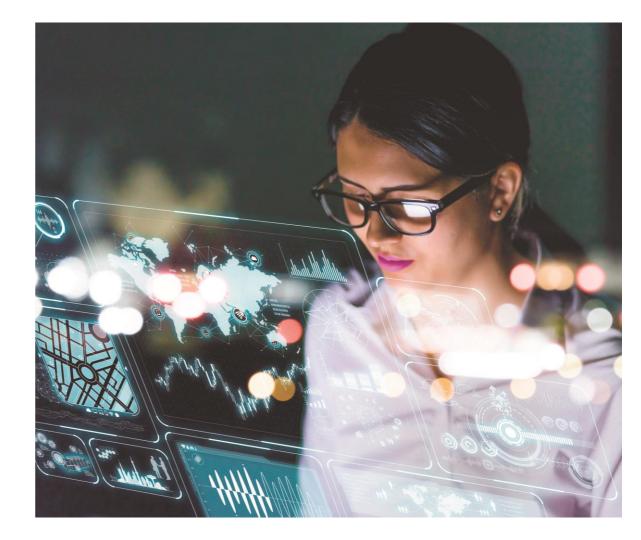

Agenda

Introduction

- UI Designer perspective
- Resources tree
- Code map
- Popup zone editor
- Designer view
- Editor view
- Properties
- Demo

Summary

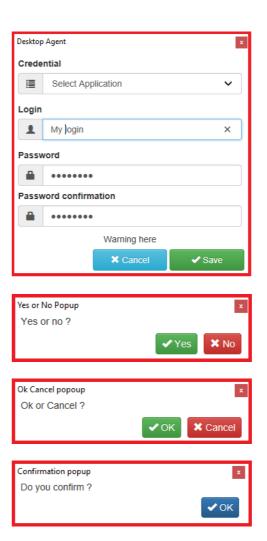

Introduction

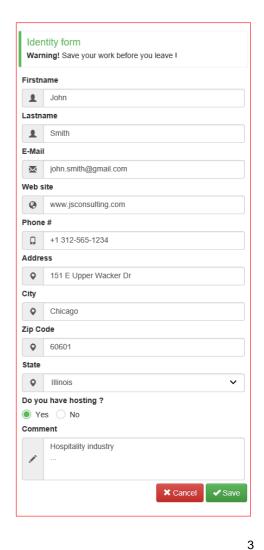

UI Designer allows you to design user intefaces

- Popups
- Forms
- Side bars
- Dashboards
- Custom pages

Desktop Studio displays the UI Designer perspective

- Based on a bootstrap grid system
- Very intuitive and easy to use

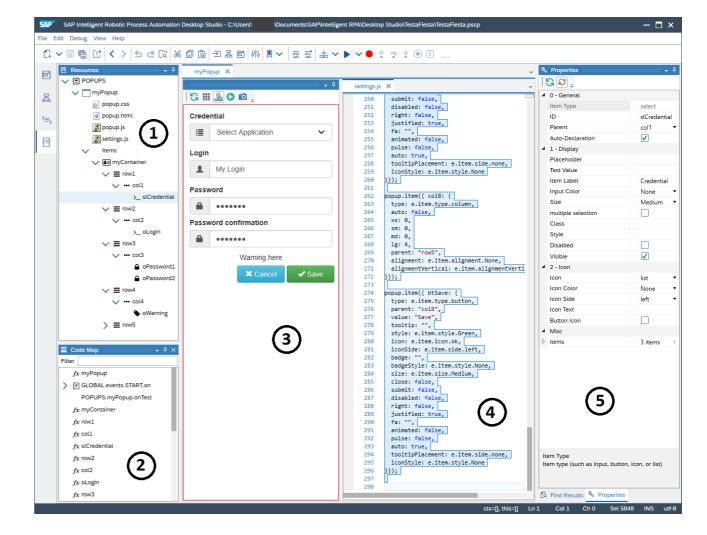

UI Designer perspective

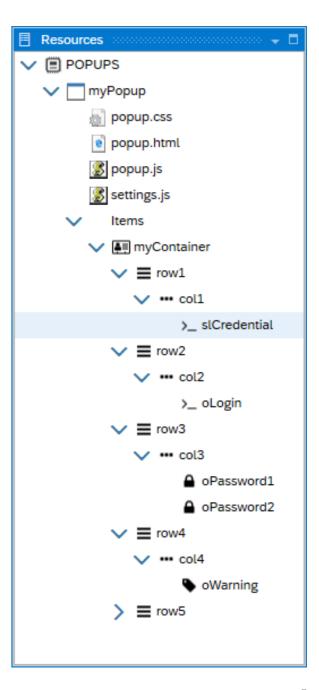

Perspective components

- Resources tree (1)
- Code map (2)
- Popup zone editor
 - Designer view (3)
 - Editor view (4)
- Properties (5)

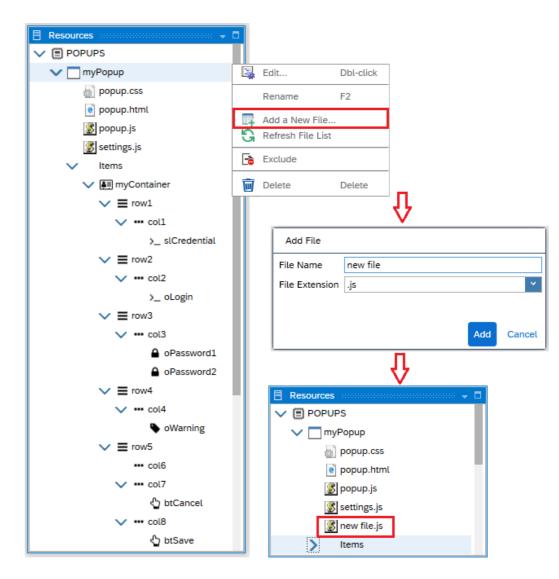

Resources tree

- Displays a list of popups
- Allows you to manage:
 - Popups included in the project
 - Add a new popup:
 - right-click the POPUPS root node
 - select Add a new popup from the context menu
 - In the dialog box
 - Enter the name of the popup: unique among the popups
 - Choose the template you need
 - Edit a popup
- Files used by the popup
- Items of the popup

Resources tree

- Displays a list of files
 - Popup.html: the HTML page
 - settings.js: the JavaScript file containing the page design
 - popups.js and popup.css: customizing the page behavior and style sheet
- Add a new file:
 - Right-click the popup node in the Resources tree
 - Select Add new file from the context menu
 - In the dialog box
 - Enter the name
 - Choose the type
 - The new file is added and displayed in the Resources tree

Code map

Code map tool window

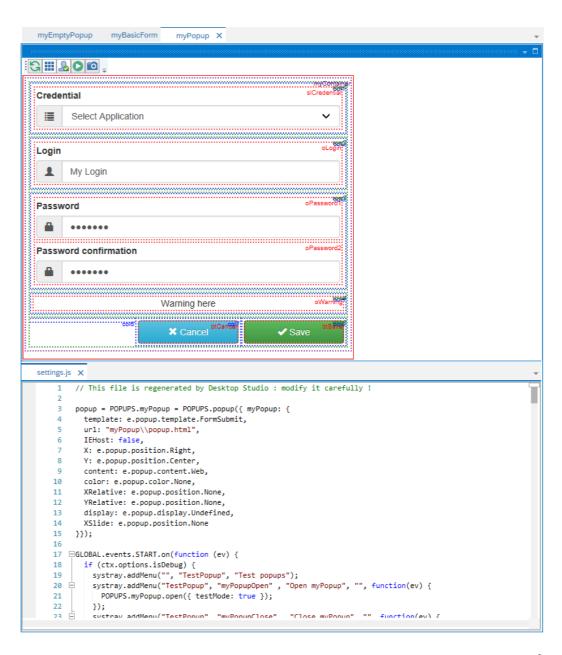

- Displays the code structure of the edited script
- Allows you to navigate to the code selecting the map entry
- Navigate from the code to the code map
 - Right-click the code editor
 - Select: Show in code map from context menu

```
settings.js X
                                            iconStyle: e.item.style.None,
                                            inputStyle: e.item.inputStyle.None,
                                            size: e.item.size.Medium
                                     93
                                          }});
                                     94
                                           popup.item({ row2: {
Code Map
                        → □ >
                                            type: e.item.type.row,

                                            alignment: e.item.alignment.None,
                                            alignmentVertical: e.item.alignmentVe
                                    136
                                          }});
                                    137
                                         popup.item({ col3: {
```

Popup editor zone

Design view

- Displays the popup in an embedded Internet Explorer window
- Allows you to graphically design popups
- Contains a toolbar with:
 - S Refresh the design from the settings.js JavaScript file
 - Switch design mode on/off
 - Switch test mode on/off
 - Open the popup in an external Internet Explorer window
 - Capture the popup to make it available in the workflow designer

Popup editor zone

Design mode

- Add new items
 - Right-click in the page
 - Select the desired item type from the list
 - The item is added to the **Resources** tree under the **Items** node
- Edit an item
 - Click the item in the Designer view
 - The properties are displayed in the **Properties** window

Popup editor zone

Editor mode

- Allows you to edit the JavaScript files associated with the popups: settings.js, popup.js, ...
- Allows you to open multiple files with:
 - Syntax highlighting
 - Unlimited undo/redo
 - Auto-completion
 - Zoom
 - □ etc...
- By editing the **settings.js** file, you can change the design of your popups in JavaScript.

```
// This file is regenerated by Desktop Studio : modify it carefully !
     popup = POPUPS.FormContact = POPUPS.popup({ FormContact: {
       template: e.popup.template.FormSubmit,
       url: "FormContact\\popup.html",
       X: e.popup.position.Center
       Y: e.popup.position.Center,
       IEHost: true,
       color: e.popup.color.None.
       XSlide: "",
       XRelative: e.popup.position.None,
       YRelative: e.popup.position.None,
       display: e.popup.display.Undefined
19 □GLOBAL.events.START.on(function (ev) {
      if (ctx.options.isDebug) {
        systray.addMenu("", "TestPopup", "Test popups");
         systray.addMenu("TestPopup", "FormContactOpen", "Open FormContact", "", function(ev) {
          POPUPS.FormContact.open({ testMode: true });
        systray.addMenu("TestPopup", "FormContactClose", "Close FormContact", "", function(ev)
          POPUPS.FormContact.close();
28
29 });
31 □POPUPS.FormContact.onTest(function(popup) {
      // TODO : add your tests here
33
    });
     popup.item({ container1: {
       type: e.item.type.container,
       fluid: true,
       saveAsHtml: true
     popup.item({ callout1: {
      type: e.item.type.callout,
       style: e.item.style.Green,
       textSize: e.item.textSize.H4;
       parent: "container1",
       title: "Identity form",
       value: "",
       test: "<strong>Warning!</strong> Save your work before you leave !",
53 popup.item({ row1: {
```

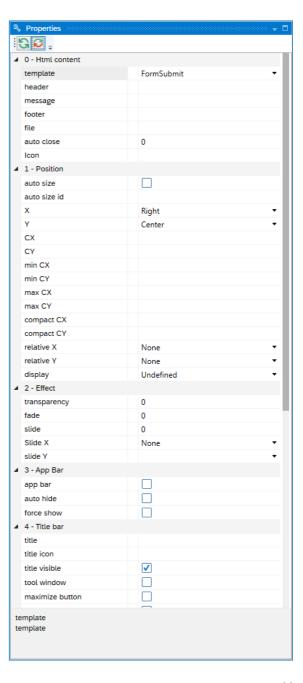

Properties tool window

Properties panel

- Allows you to change the properties of popups and items
- Has a toolbar with:
 - Manually refresh the design view properties value
 - Switch auto-refresh mode on/off

Edit properties

- From the Design view
 - Select the item in design mode or
 - Right-click the item and select Edit Item or Edit Popup from the context menu
 - The properties are then displayed in the property grid

Properties tool window

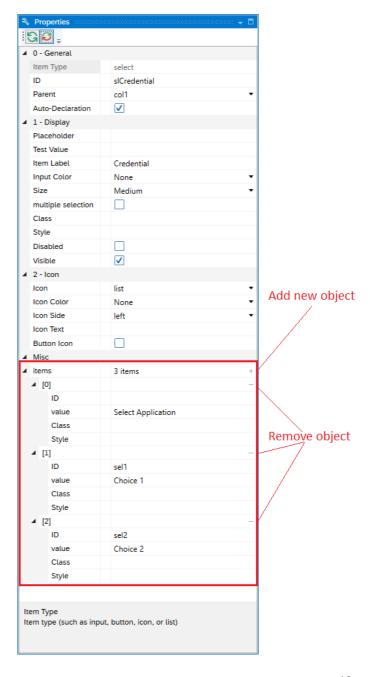

Refresh mode

- If auto-refresh mode is on, the Design view is automatically updated each time a property change is validated in the property grid
- If not, the updates have to be done manually using the refresh button

Manage complex items

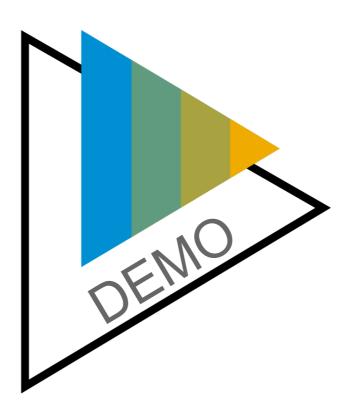

- Some items like radio buttons, checkboxes, etc.
- With properties that are editable as arrays of objects:
 - Add a new object to the array using the + button
 - Remove an object from the array using the button

NOTE: You can edit these properties in the **settings.js** file

Demo

UI Designer demo

Thank you.
